2026/27 entry
Degrees and university-level study

Welcome to City College Norwich Higher Education

Are you ready to take the next step towards your future? At City College Norwich Higher Education (HE), we recognise that when it comes to university-level study, a one-size-fits-all approach doesn't work for everyone. Our courses have one crucial difference to those you will find in many larger universities: they have been designed to fit your life and career aspirations.

Whether you're considering a Degree, Foundation Degree, or Higher National/Higher Technical Qualification, studying with us can open doors to new possibilities. We offer courses that are designed to fit your needs, and are often sector and employer endorsed, ranging from Animal Science to Zoology, Aircraft Maintenance to Electronics, Childhood Studies to Youth Work, Business to Social Sciences, Health Care to Sport Science, Construction Management to Software Development, and so much more.

What makes our community so special is the mix of people who choose to study with us. Some have just left school or college, while others are changing careers, returning to education after a break, or gaining qualifications through higher and degree apprenticeships. Whatever your background or circumstances, we'll work with you to help you aim high and succeed.

I know the decision to start studying at university level isn't always easy, especially if you're balancing your studies with work, family, or other commitments. That's why we put so much emphasis on the support we offer every single student and apprentice who joins us. At CCN HE, you're not just another number - you're seen, heard, and supported. Our smaller class sizes help us provide a more personal experience, with dedicated teams who genuinely care about you and your success.

Our teaching and support staff are here to guide you every step of the way - and our 2024 National Student Survey results show just how much our students value the support and care they receive from us.

You'll become part of a vibrant academic and professional community. Studying here isn't just about lectures and assignments, it's about building your future. You'll have access to fantastic specialist HE facilities, employer connections, our university partnership with UEA, and chances to get involved in student-led forums, events, and the Students' Union.

We are fortunate enough to be able to celebrate HE success and completion at our fabulous graduation ceremony at Norwich Cathedral where friends and family can join you as you celebrate your achievements. This is always my favourite 'work day', to be able to witness and see the outcomes that the transformational journey of studying with CCN HE can bring.

Come along and talk to us about our courses at one of our open events - dates are advertised on our website and social media. We would love to see you and explain further how our university-level courses can take you to where you want to be. And in a few years from now you can be part of our graduation ceremony, celebrating with a new qualification in your hand and a whole host of opportunities at your fingertips.

Samantha Ratcliffe

Why study with CCN HE?

With flexible study options, lower fees and smaller class sizes, City College Norwich Higher Education provides a great alternative to traditional university.

Our courses have one crucial difference to those you will find in many larger universities: they have been designed to fit your life and career aspirations. If you choose to study with us, you will benefit from the following:

A local and affordable option

University-level courses delivered on your doorstep. Most of our students are from the Norfolk and Suffolk area and are attracted by the many benefits of studying close to home and living.

Flexible study

Our teaching is condensed, usually into two days a week, to allow you to combine your studies with work and other commitments you may have.

Specialist courses

We deliver Higher Education in subject areas across a variety of sectors and industries. All of our degrees are validated by our partner university, University of East Anglia, while our other university-level courses are validated by the relevant professional awarding bodies. We don't offer courses in every subject area, only those where we have built up a strong area of expertise over many years.

Our courses are taught by experienced lecturers, supported by superb links with employers, and with access to professional facilities.

Smaller classes

Another distinctive feature of our courses is our smaller class sizes. This ensures you get all the support you need throughout your course. A real benefit of our smaller, specialist community is that your lecturers and pastoral support are accessible to you and available to help when you need them.

Expert professional tuition

Our lecturers are experts in providing excellent academic and vocational teaching. They maintain close links with their sector, so that you benefit from learning that is relevant and fully up-to-date for your chosen career.

Fantastic facilities

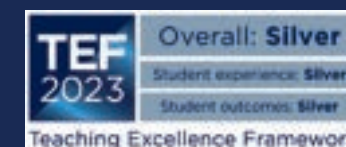

The college provides outstanding facilities that enrich both academic and social experiences. Purpose-built spaces like the DigiTech Building at our CCN campus, the Aviation Academy, the Easton College Centre of Excellence for Sport, and the Animal Management Centre offer valuable hands-on learning opportunities.

Well-resourced libraries across each campus support study and research, while our dedicated HE campus in the city centre, our cafés and open green areas offer ideal spots to relax and socialise.

Outstanding progression to employment and further study

97% of our full-time graduates and 100% of our part-time graduates are in employment or further study six months after completing their degree (Teaching Excellence and Student Outcomes Framework 2019). This places our higher education college in the top 10% of providers for this performance measure.

We're TEF Silver

We are proud to have been awarded Silver in the 2023 Teaching Excellence Framework (TEF) which is evaluated every four years. TEF is a national scheme run by the Office for Students (OfS) that aims to encourage higher education providers to improve and deliver excellence in the areas that students care about most: teaching, learning and achieving positive outcomes from their studies.

Partnership with University of East Anglia

City College Norwich Higher Education has a long established and successful partnership with the University of East Anglia - a university recognised for its excellence both in the UK and globally.

UEA ranks among the UK's top 25 universities (Complete University Guide 2025) and top 30 (The Mail 2025), and is in the UK's top 20 for research quality (Times Higher Education Rankings - REF 2021). Internationally, UEA is placed in the world's top 100 (Times Higher Education Impact Rankings 2024) and ranks in the global top 20 for Health and Wellbeing (QS World University Rankings for Sustainability 2024). The university also holds an Athena SWAN Silver Award (since 2019), recognising its ongoing commitment to advancing gender equality across all disciplines.

This link between two of the major educational institutions in Norwich is part of our exciting vision for seamless progression routes for students and allows us to be more responsive to the skills and knowledge needs of local employers and the regional economy.

All of our Higher Education Degree programmes delivered at the college are validated by UEA, meaning that the quality of the awards that you get is assured by a world renowned Higher Education organisation.

As a CCN HE student, you will have access to a UEA campus card (on request) allowing use of the following resources at UEA:

- Access to UEA Library building and facilities
- Library borrowing
- Walk-in access to a range of e-resources
- IT account - on request
- Library catalogue and help sheets via the web

As a student you will be eligible for the Educational Membership at the Sportspark on the UEA campus. The fantastic facilities include an Olympic size swimming pool, a gym and studios, an outdoor athletics track, outdoor pitches, a climbing wall, squash court and a gymnastics centre.

UEA
University of East Anglia

Types of qualifications

When you study on a university-level course with us, you will be working towards a qualification that is recognised and respected – opening a world of opportunity for your continued learning and career development. We offer a wide range of qualifications designed to suit different ambitions, academic backgrounds, and career goals. Whether you are pursuing undergraduate study, developing your professional skills, or undertaking advanced research, you will find a course that aligns with your aspirations.

Higher Education providers like to use quite a lot of jargon, so we've provided a definition of the key terms we use to describe our courses.

Qualification Type	Level	Duration	Description
Bachelor's Degrees given the title of either Bachelor of Art (BA) or Bachelor of Science (BSc), typically with honours (Hons)	Level 6	3 years	Usually three-year programmes with the depth of study increasing through the three years i.e. you will start with Level 4 modules in year one, moving through Level 5 and onto Level 6 modules by the final year.
Foundation Degrees given the title of either Foundation degree of Arts (FdA) or Foundation degree of Science (FdSc)	Level 5	2 years	This level of study is equivalent to the first two years of an undergraduate bachelor degree.
Higher National Diploma (HND)	Level 5	2 years	These are more advanced than a HNC and are often used as a pathway to a full degree.
Higher National Certificate (HNC)	Level 4	1 year	This is a work-related, or vocational, higher education qualification, equivalent to the first year of a degree.
Higher and Degree Apprenticeships	Levels 4-6	Varies	Work-based learning through an employer, where you will follow standard qualification levels.
Teacher Training (NTTC)	Level 7	Varies	Primary and secondary teacher training courses leading to Qualified Teacher Status (QTS) - a legal requirement to teach in state schools in England.

Degrees awarded by UEA

We are a Partner College of the University of East Anglia (UEA). This means that our degrees are awarded by UEA, which ranks among the UK's top 25 universities (Complete University Guide 2025) and top 30 (The Mail 2025), and is in the UK's top 20 for research quality (Times Higher Education Rankings – REF 2021).

HNCs and HNDs recognised by employers

Our HNC and HND courses are awarded by Pearson, the leading awarding body for Higher National qualifications in the UK. The robust and industry-relevant content within these qualifications means that employers in your chosen sector will recognise your achievements and the hands-on experience completed throughout your course.

Higher Technical Qualifications

Some of the Higher Nationals and degrees that are delivered are also HTQs. These are Level 4 or 5 qualifications that have been quality marked by IfATE to indicate their alignment to employer-led occupational standards. They are technical qualifications that employers have helped develop so you can get the right training and skills you need. HTQs are an alternative to apprenticeships or degrees. They may suit you if you want a more practical, employer-led study programme. Look out for the HTQ logo against courses with this quality mark.

Professionally recognised qualifications

We work with a number of professional bodies, including the Chartered Management Institute and Chartered Institute of Professional Development.

Access to Higher Education

Want to study for a degree but don't have the qualifications?

Get to where you want to be with an Access to Higher Education course

Access to Higher Education courses offer an excellent starting point, helping you gain the skills and qualifications needed to progress to degree-level study and pursue your chosen career. Our Access to Higher Education Diplomas, validated by the Cambridge Access Validating Agency (CAVA), are designed to prepare you for university and beyond.

These flexible Level 3 qualifications are a well-recognised alternative to A Levels, designed with both career progression and employer needs in mind. Many of our diplomas align with Local Skills Improvement Plans and the broader demands of the local economy, preparing you for further study and employment in rapidly developing industries.

You'll build study skills through our academic development programme, with guidance from your course leader throughout. Our dedicated Access to HE team will also support your university application, whether you continue your studies with us or apply elsewhere.

Am I eligible to study?

To study an Access to Higher Education course you need to meet the following criteria:

- Aged 19+
- Have a grade C (grade 4) or above in GCSE English and Maths

Selection is based on an interview, during which we'll discuss your suitability for the course and ensure it aligns with your goals and needs.

Scan the QR codes to discover everything you need to know about each course, including tailored entry requirements. Want to know more? Visit our website for all the details: www.he.ccn.ac.uk/access-to-he

Creative Arts

Unleash your creativity with our inspiring creative arts course. Develop your skills in drawing, colour theory, and contextual studies, exploring modernism and postmodernism. Work on self-directed projects, refine your reflective evaluation, and gain essential study skills for higher education. Showcase your talent in a final major project, culminating in a public exhibition.

Computing

New for 2026/7
Details of this programme will be added to our website after September 2025

This course provides the foundational knowledge and practical experience to progress onto academic courses at university-level, or to pursue careers in IT. You will study a range of subjects in the field of computer science, including Programming, Cyber Security, Networks, Databases, and Machine Learning/AI, utilising our fantastic college facilities, as well as developing academic skills such as critical thinking and how to research topics, that you will need for higher-level study.

Engineering

Build a strong foundation in engineering with our comprehensive course, covering mathematics, mechanical and electrical principles, CAD, and materials science. Develop practical and research skills while enhancing your problem-solving abilities through hands-on projects and coursework.

Humanities and Social Sciences

This course offers a diverse exploration of human society and culture. Study psychology, focusing on key perspectives and psychopathology, and delve into sociology with topics like meritocracy and global social debates. Explore cultural studies, media, and youth subcultures, while examining English literature, history, and political philosophy. Gain a well-rounded understanding of society's complexities and prepare for a range of academic or professional paths

Sports Science

New for 2026/7
Details of this programme will be added to our website after September 2025

Advance your knowledge of sports science with our engaging course, covering biomechanics, exercise physiology, and sports coaching principles. Develop practical skills in injury prevention and rehabilitation, preparing for a career in sports performance, coaching, or therapy.

Science (Health)

Discover the foundations of health and science with our dynamic course, covering human physiology, cell growth, and living organisms. Gain essential skills in chemistry, data handling, and research methods while developing your understanding of statistics and scientific principles. With a focus on practical application, study skills, and a dissertation project, this course prepares you for further study or a career in health sciences.

Land-Based Studies (Animal and Countryside Management)

This course offers a comprehensive blend of business skills and practical land-based knowledge. Develop expertise in animal science, welfare, ecology, conservation, and agriculture, while working on a year-long research project. Gain valuable hands-on experience and knowledge to manage and protect the countryside, preparing you for a rewarding career in land-based industries.

Access to Higher Education Diplomas get you degree-ready in just one year!

Scan the QR codes to find out more or visit www.he.ccn.ac.uk/access-to-he

Going from A to B

Where can our Access to HE courses lead?
Going from our Access to Higher Education courses to BA (Hons), BSc (Hons), HNCs, HNDs, and more is a great way to cultivate practical skills and expertise.

Through Access to Higher Education courses, you can embark on a journey towards achieving Bachelor's degrees with honours, alongside opportunities to pursue specialised qualifications such as HNCs and HNDs.

This continuum of learning fosters academic growth, empowering you to navigate your chosen fields with confidence and competence. Whether aspiring towards a traditional university degree or seeking specialised vocational training, our range of options opens doors to career opportunities. See where our Access to Higher Education courses can take you below:

Access to Higher Education Course	Progression routes at City College Norwich HE

Are you ready to kick start your journey to a high-flying career?

This specialist aviation engineering degree course will allow you to gain practical experience alongside advanced academic study. Delivered in partnership with KLM UK Engineering and awarded by the University of East Anglia, this course has been designed to ensure you develop the knowledge, technical skills, understanding and awareness necessary to work in technical, supervisory or management roles in the industry.

Modules include:

- Materials and Hardware
- Workshops and Aircraft Practices
- Application of the Principles of Physics
- Engines and Propellers
- Electrical Fundamentals
- Aeroplane Aerodynamics, Structures and Systems
- Electronic Fundamentals, Digital Techniques and Aerodynamics

Kick-start your career in aviation with our Foundation Year in Aviation Engineering.

Designed for those looking to build essential skills and knowledge, this course provides a strong grounding in engineering principles, aircraft systems, and maintenance practices.

Modules include:

- Aircraft Engineering Fundamentals
- Aircraft Hardware and Maintenance Practices
- Aircraft and Flight
- Aircraft Power
- Maintenance Practices
- Materials and Hardware
- Workshops and Aircraft Practices
- Application of the Principles of Physics
- Engines and Propellers
- Electrical Fundamentals
- Aeroplane Aerodynamics, Structures and Systems

Student spotlight

Adam

Studied: BSc (Hons) Professional Aviation Engineering Practice
Currently: An avionics apprentice with Eagle Copters in Calgary, Canada

I graduated with a BSc (Hons) in Professional Aviation Engineering Practice in 2022, and shortly afterwards I secured an avionics apprenticeship with Eagle Copters in Calgary, Canada. I'm absolutely loving the role – no two days are ever the same!

I've had the opportunity to work on a wide range of aircraft, including helicopters used by the Calgary Police, air ambulances, and those involved in aerial firefighting – which is especially important here due to the frequent forest fires. One of the highlights so far has been working on a helicopter that appeared in the final series of Stranger Things! At the moment, we're working on a Bell 205 helicopter with a 1963 serial number that actually flew in the Vietnam War. The variety of projects I get to be involved in is incredible.

My time on the course really gave me the knowledge and practical skills I needed to step straight into the industry.

Employers are really keen on candidates who've had hands-on experience, and the Boeing 737 at the International Aviation Academy – or 'Elsie' as we all called her – was perfect for that. We had loads of opportunities to apply what we were learning in a real-world setting.

Another major benefit was learning from lecturers who had worked in the aviation industry for years – both from KLM and City College Norwich. Their insights and experience were invaluable and played a big part in helping me land my first position after graduation.

Looking ahead, I'm aiming to get my avionics licence and eventually move into aircraft design and certification engineering.

Facility highlight

International Aviation Academy Norwich

Step into the cockpit of your aviation career at the International Aviation Academy Norwich (IAAN). A world-class training centre located within the Airport Industrial Estate. Housed within a transformed 1930s RAF hangar, this £12 million facility combines historical significance with cutting-edge technology to deliver unparalleled aviation education.

Designed by leading interdisciplinary consultancy Hamson Barron Smith, the academy's refurbishment project captures the spirit of advanced engineering and twenty-first-century innovation.

The International Aviation Academy Norwich offers state-of-the-art facilities designed to replicate real-world aviation settings. The academy features 20 fully equipped classrooms, five specialist engineering workshops, and an impressive Emulation Zone featuring a fully operational Boeing 737. This authentic aircraft provides students with hands-on experience in a live environment, bridging the gap between classroom learning and real-world application.

With the capacity to train up to 500 students each year, IAAN serves as a launchpad for global aviation careers. Thanks to its strong industry links and practical training model, graduates have gone on to secure roles with top employers including KLM, Ryanair, Virgin, and Bombardier, demonstrating the academy's reputation for producing job-ready aviation professionals.

Key features

20 cutting-edge classrooms

Learn in bright, modern spaces fitted with the latest teaching tech to support interactive, industry-relevant lessons.

5 specialist engineering workshops

Fully operational engineering workshops for hands-on learning

Easton
College
campus

UCAS course
code: D300

Are you passionate about making a meaningful difference to the lives of animals? Gain insight into key Animal Science disciplines, including health, husbandry, nutrition, and behaviour with our BSc (Hons) Animal Science degree.

You will have access to our on-site Animal Management Centre which houses over 86 species, in addition to livestock on our farm, and horses at our Equestrian Centre based at our Easton College campus. These opportunities help to enhance your academic knowledge and where appropriate help to build practical experience and employability, for example, through carrying out animal welfare assessments.

Modules include:

- Animal Anatomy and Physiology
- Animal Health and Disease
- Applied Animal Husbandry
- Zoo Animal Management
- Animal Nutrition
- Reproductive Biology and Genetics
- Applied Animal Behaviour and Welfare Science
- Science Communication for Animal Scientists

BSc (Hons) Wildlife and Conservation

Are you inspired by nature, wildlife, and our ever-changing world? Our BSc (Hons) Wildlife and Conservation degree offers a comprehensive understanding of native and global animal and plant species, with opportunities to explore your individual interests through project-based research.

Our range of science and practical modules will help you develop the skills needed for careers in Ecological Consultancy and Wildlife Conservation. You will benefit from access to our designated county wildlife site at the Easton College campus. This invaluable resource provides hands-on opportunities to develop practical species identification and field research skills, bridging the gap between academic knowledge and real-world application.

Modules include:

- British Wildlife and Identification
- Practical Habitat Creation and Management
- Field Ecology
- Global Biodiversity
- Introduction to QGIS
- Management Planning for Habitats
- Conservation Biology
- Ecological Techniques for Industry

BSc (Hons) Zoology

Zoology incorporates the study of biology, ecology and biodiversity in order to better help manage and conserve the earth's fragile ecosystems. Our BSc (Hons) Zoology degree provides you with the practical and theoretical knowledge to approach contemporary challenges locally, nationally, and globally.

You will develop an understanding of both native and global animal and plant species, whilst also being able to develop your individual interests further through project-based research. This course will also provide a good knowledge base for you to continue into further study at master's level.

Modules include:

- Animal Anatomy and Physiology
- Principles of Environmental Science and Ecology
- Wildlife Management
- Behavioural Ecology
- Global Biodiversity
- Introduction to QGIS
- Invertebrate and Vertebrate Zoology
- Animal Social Behaviour
- Conservation Biology
- Environmental Animal Physiology
- Science Communication for Conservationists

Student spotlight

Frances

Studied: BSc (Hons) Wildlife and Conservation
Currently: Volunteering with the RSPB on a remote island off Northern Ireland

I began my journey with City College Norwich at Easton College by studying a Level 3 in Countryside Management, while also volunteering regularly with local ecological organisations. I was inspired to stay on at CCN HE and went on to complete a BSc (Hons) in Wildlife and Conservation in 2023.

CCN HE is a fantastic alternative to a traditional university, particularly if you want to work or volunteer alongside your studies. Having access to the farm and the nature reserve for practical sessions was such a valuable part of my experience.

I've loved all the practical fieldwork modules and species identification we get to do. It's been a lot of fun applying what I've learnt in the classroom to real-world environments. As someone from a non-environmental background, the course has given me direction and allowed me to find what

I'm passionate about, sparking a lifelong interest in nature and wildlife.

Since graduating, I've continued volunteering, including butterfly surveys at Broadland Country Park and meadow work with the Trust for Conservation Volunteers. Leading volunteer groups has also helped me grow my leadership skills.

Volunteering alongside my studies gave me practical experience and the confidence to apply what I was learning in real-life settings.

I'm excited to be joining a three-month residential volunteering project with the RSPB on a remote island off Northern Ireland. After that, I hope to work as a ranger or warden, while continuing my volunteering journey.

Facility highlight

Animal Management Centre

Get stuck into real-world learning at our cutting-edge Animal Management Centre on our Easton College campus – purpose-built to mirror professional environments found in zoos, aquariums, and the pet care industry.

You'll work hands-on with a wide variety of animals, building the practical skills you'll need for exciting careers in animal care, veterinary nursing, zoology, conservation and more. Everything about the centre is designed to reflect the industry – giving you the confidence, experience and edge to step straight into the world of animal management.

Step into our Exotic Environments – one of our rooms has been transformed to resemble a modern zoo, complete with large walk-in enclosures that house incredible species like a boa constrictor and a water dragon. These immersive enclosures allow the animals to express natural behaviours in realistic surroundings – and give you first-hand experience managing complex habitats.

In our second exotic room, you'll find enclosures modelled on the pet retail industry. It's your chance to get familiar with handling and caring for species commonly found in pet shops, preparing you for roles in commercial animal care.

Head into the Aquatics Room and you'll discover our custom-built coral propagation and fish breeding system. It's packed with the latest tech, including storm simulation features and advanced water quality monitoring – all of which can be controlled at the touch of a button. With open-access filtration systems, you'll learn the science behind aquatic care in a clear, hands-on way.

Key features

Zoo-Style Exotic Rooms

Walk-in enclosures with species like a boa constrictor and water dragon, designed to encourage natural behaviours.

High-Tech Aquatics Room

Advanced breeding systems, remote monitoring, and storm simulation plus endangered goodeids in partnership with ZSL.

Innovative Nocturnal Room

Moonlight-effect lighting lets you observe nocturnal animals during the day.

Climate-Controlled Learning Spaces

Independent room climates and lighting that mimics seasonal day lengths.

You'll also be part of our exciting conservation work. We care for goodeids – an endangered species of freshwater fish – through our partnership with the Zoological Society of London (ZSL). The Animal Management Centre is a member of the British and Irish Association of Zoos and Aquariums (BIAZA) and utilises the Zoological Information Management System (ZIMS) to record data about the species in our care, as well as Seneye to monitor our aquatic systems. ZIMS is widely used in zoos globally and contributes to modern zoo research. Our collection is overseen by a specialist zoo veterinary team, ensuring our animals receive care that meets the highest industry standards.

Shape your future as a business leader with our Business and Professional Qualifications.

Based in Norwich's vibrant city centre, you will be exposed to local and national businesses, plus valuable networking opportunities. With courses from Level 4 to Level 6, we cater to aspiring team leaders and experienced managers alike, providing a solid foundation of academic theory and practical learning. Our expert tutors bring industry experience to the classroom, ensuring real-world relevance.

Norfolk
House
campus

CCN course
code: K1094

Our Leadership and Management degree is dual accredited by the Chartered Management Institute (CMI) and is suited to those looking to begin or develop a career in a variety of management functions both in the business and public sector.

This programme will equip you with the skills and strategies to deal with contemporary challenges in management practice. It has been developed in consultation with local and global partners and professional bodies. We regularly arrange industry guest speakers from local employers to enhance delivery of module content.

Modules include:

- Organisational Behaviour
- Marketing Principles and Practice
- Leading Change in Organisations
- Employment and Contract Law
- Business Analysis
- Developing Ethical Leadership

A Chartered Manager takes responsibility for people, projects, operations and/or services to deliver organisational success; they receive professional recognition of their ability to deliver impact, behave ethically and demonstrate their commitment to continual learning and development.

The programme will equip you to deal with challenges in management practice. It has also been developed in consultation with local/global partners and professional bodies, and has been mapped to Chartered Management Institute (CMI) standards. 90% of management apprentices agree they are acquiring the skills to be more productive at work. (Figure acquired from CMI)

Contents include:

- Setting Direction and Strategic Decision-Making
- Building/ Leading Teams
- Developing Skills, Motivating Others and Clear Communication
- Fostering Inclusive and Ethical Cultures
- Project/ Financial Management
- Innovation/ Risk Management
- Developing Relationships

Discover how to find an Apprenticeship:

Higher Apprenticeship - CMI Operations/ Departmental Manager

5

Level 5

Apprenticeship
2 yearsNorfolk
House
campusCCN course
code: K0090

An Operations/ Departmental Manager is someone who manages teams and/ or projects and achieves operational or departmental goals and objectives as part of the delivery of the organisation's strategy. By the end of the course, you will be better prepared to manage teams and individuals, setting appropriate targets and facilitating effective working practices. The curriculum also covers personal development and project management.

You need to have an employer to support your apprenticeship and be employed in a relevant job role. Apprentices will acquire the knowledge, behaviour and skills in the following areas through completing the Chartered Management Institute (CMI) Level 5 Diploma in Management and Leadership qualification:

Units include:

- Principles Of Developing, Managing and Leading Individuals and Teams to Achieve Success
- Managing Stakeholder Relationships
- Managing Projects to Achieve Results
- Creating and Delivering Operational Plans

Nadine

Studied: BA (Hons) Leadership and Management
Currently: Working at Flagship Group

I didn't go to university when I left school - I wasn't really sure what I wanted to do at the time. But through my degree apprenticeship at City College Norwich, I discovered a renewed passion for learning. I feel re-energised and motivated again.

I think for me, the one thing that I wanted to get out of a course was that peer-to-peer networking to learn around other organisations locally and City College Norwich HE was able to offer that.

The course really pushed me out of my comfort zone. It had such a positive impact on my confidence, and I learnt new things about myself. I never thought I'd enjoy data or be comfortable with numbers, but now I do and that's something I would never have said a few years ago.

One of the best parts is being able to apply what I've learnt directly to my job.

We recently launched a new leadership development programme, and I've been able to contribute ideas and knowledge from my studies to support leaders across the group.

I made some great friends over the last three and a half years and graduating together was a real highlight.

Hear from our current Level 6 Chartered Manager Degree Apprentices, experienced professionals who are leading teams at the Norwich School of Hair and Beauty (NSHB). These apprentices' insights offer a valuable look into how the Chartered Manager Degree Apprenticeship supports career progression, enhances team performance, and helps them grow into confident, capable leaders within the hair and beauty sector.

The Degree Apprenticeship has been a transformative journey, guiding and inspiring me by bridging theory with real-life practice. It has equipped me with the essential management and leadership approaches needed for my new role as Vice Principal. Without this apprenticeship, I would not have gained the skills, confidence, and knowledge required for my promotion. It has truly been the foundation of my professional growth and success.

Sarah

Apprenticeships at NSHB have been transformative, equipping both myself and my fellow apprentice with real-world skills while strengthening our business with fresh talent and innovation. The return on investment is clear - developing skilled professionals who contribute to the industry and ensuring NSHB remains a leader in hair and beauty education. Looking ahead, apprenticeships will continue to shape the future of our school, fostering growth, excellence, and opportunity for all.

Peter

The impact of my apprenticeship on NSHB has been vast. We have been able to diversify the businesses offering through innovative ideas that have been inspired through content on the degree course. Personally, my apprenticeship has given me opportunity to learn and grow as a manager, which I would not have had without this, and I would highly recommend anyone looking to grow as a person and within their career to join a course like this.

Megan

Explore how young people grow, learn and develop with our Childhood and Youth Studies courses, equipping you with the skills to support and inspire the next generation.

Working with children is both a rewarding and dynamic career. Our degrees and apprenticeships provide both the theoretical knowledge and practical experience needed to understand children's needs and support their growth.

BA (Hons) Additional Needs and Disabilities (Children and Young People)

6

Level 6

Full Time
3 years

Norfolk
House
campus

UCAS course
code: X360

Unlock your potential to support children and young people with additional needs and disabilities, and their families, with our BA (Hons) Additional Needs and Disabilities (Children and Young People) degree.

You will gain insight into many of the disciplines associated with supporting children and young people with additional needs and disabilities including diagnosis and developing, historical, cultural, social, and political attitudes and values, exploring behaviour, care and education, transitions and how to promote independence, assistive technology, health, inclusion, rights, creative practice, and innovation in the field.

Modules include:

- Attitudes and Values
- Inclusive Development
- Understanding Behaviour
- The Autism Spectrum
- Focused Care and Education
- Safeguarding and Multi-Agency Working
- Health, Identity and Wellbeing
- Transitions and Promoting Independence

BA (Hons) Childhood and Youth Studies

6

Level 6

Full Time
3 years

Norfolk
House
campus

UCAS course
code: L530

Passionate about understanding how children and young people develop and how society, culture, and environments shape their experiences?

You will gain an in-depth understanding of child and youth development, along with sociological and cultural perspectives, while developing essential skills like critical thinking, research strategies, and problem-solving. Whether you are aiming to work directly with children or influence the systems that shape their lives, this degree will empower you to create positive change and support the holistic wellbeing of children and young people from conception to early adulthood.

Modules include:

- The Childhood and Youth Sector
- Human Growth and Development
- Health and Wellbeing
- Digital Citizenship
- Mental Health Support
- Safeguarding
- Youth, Culture and Identity
- Creativity and Applications in Practice
- International Perspectives

BA (Hons) Childhood Studies (Top-Up)

6

Level 6

🕒

Full Time
1 year

📍

Norfolk House campus

📄

UCAS course code: X310

This programme is fantastic for anybody looking for, or already working in, a career with children and young people. This course enhances practice and facilitates professional progression through the acquisition of transferable skills, such as reflecting in and on practice, working collaboratively and effectively as a team member, and conducting research using appropriate tools and methodology.

In addition to the wide variety of transferable skills that are taught, study of this programme will enable you to analyse ethical and professional conflicts that arise in practice and to develop the ability to communicate knowledge and ideas in your own existing or prospective settings.

Modules include:

- Creativity and Applications in Practice
- International Perspectives
- Leadership and Management
- Specialised Support and Interventions
- Dissertation (Research Project)

Youth Worker Degree Apprenticeship

6

Level 6

🕒

Apprenticeship
3 years

📍

Norfolk House campus

📄

CCN course code: K0145

Our Youth Work Degree Apprenticeship programme is designed to offer a comprehensive and professionally recognised qualification, equipping you with the knowledge, skills and behaviours needed to make a meaningful impact to young people's lives. Aligned with the National Youth Agency's (NYA) standards and Occupational Standards for Youth Worker, the course has been co-designed with young people and stakeholders, employers, local councils, charities and youth workers from across Norfolk, Suffolk, Cambridgeshire and Essex, ensuring it reflects current real-world needs and prepares you for the evolving future of youth work.

The curriculum blends theory, policy, and practice, helping you critically engage with key issues in youth work while providing hands-on experience in areas such as safeguarding, multi-agency working, informal education, active citizenship, mentoring, group work, research, and project management. You will develop practical expertise in communication, anti-discriminatory practice, and evaluation, as well as the ability to drive positive change in organisations and communities.

Student spotlight

Emily

Studied: BA (Hons) Childhood and Youth Studies
Currently: Teaching at City College Norwich Higher Education

I began my journey at City College Norwich with a Level 3 in Childcare, studying while working at a nursery. It was during this time that one of my lecturers inspired me to pursue the BA (Hons) in Childhood and Youth Studies. Throughout the course, I continued working as a nursery room manager during the week and as a healthcare assistant at the weekends.

City College Norwich HE was the perfect option for me because it allowed me to work alongside my degree. I was able to manage a part-time job, which I don't think I would have been able to do if I had chosen a different route. It gave me the flexibility I needed, and I truly believe I wouldn't have the job I have now if I hadn't been able to gain practical experience while studying.

Originally, I had planned to become a secondary school teacher. However, after applying for a role

as a tutorial supervisor at City College Norwich, supporting both Health and Social Care and Childcare FE courses, I realised my true passion lies in post-16 education. I'm currently training for a Level 5 Diploma in Education and Training, with hopes of gaining full QTLS (Qualified Teacher Learning and Skills Status).

Through my role, I've already been able to gain plenty of teaching experience, as I provide cover when lecturers are not available. My ultimate goal is to become a lecturer, so this experience really sets me up for success in that regard.

I can't thank City College Norwich HE enough for the support they gave me. They offered so much emotional support, which I don't think another university would have provided. I honestly believe I have my degree because of CCN HE. Now, I want to give back to others what CCN HE gave me.

Working in construction or engineering offers the opportunity to be part of projects that shape the built environment, from bridges and buildings to transport systems and infrastructure.

With strong industry links, modern facilities, and experienced lecturers, our courses provide an ideal foundation for those aiming to progress in areas such as site management, surveying, or sustainable construction. Whether you're advancing your career or entering the industry for the first time, we deliver a hands-on, career-focused education in construction.

Higher Apprenticeship - Engineering Manufacturing Technician (Electrical Electronic)

4

Level 4

Apprenticeship
2 years

City
College
Norwich

CCN course
code: K0026

Are you ready to embark on a dynamic career in engineering?

This apprenticeship offers hands-on experience with standard workplace operations, with a particular emphasis on electronic and electrical engineering.

To start this apprenticeship, you must be employed in a relevant job role and have the support of your employer.

On this course, you will:

- Learn to work with standard operations in the workplace, focusing on electronic and electrical engineering
- Develop problem-solving skills
- Build strong interpersonal relationships
- Gain an understanding of the broader engineering sector and organisation
- Learn the importance of customer service in engineering roles
- Learn how to liaise with stakeholders to meet requirements and specifications

Higher Apprenticeship - Engineering Manufacturing Technician (Mechanical)

4

Level 4

Apprenticeship
2 years

City
College
Norwich

CCN course
code: K0027

Are you passionate about mechanical engineering and ready to take your career to the next level? Our Higher Apprenticeship in Engineering Manufacturing - Mechanical Technician offers the perfect opportunity to gain industry-recognised qualifications while working and earning.

Develop your mechanical engineering skills in a manufacturing setting through a mix of on-the-job experience and off-the-job training. To start this apprenticeship, you must be employed in a relevant job role and have the support of your employer.

On this course, you will:

- Learn to work with standard operations in the workplace, focusing on mechanical engineering
- Learn how to produce technical documents/ reports/ specifications regarding quality, reliability, production schedules, targets and other technical information
- Gain an understanding of the broader engineering sector
- Learn the importance of customer service in engineering roles
- Learn how to liaise with stakeholders to meet requirements and specifications for products and projects

Facility highlight

Digi-Tech Building

Are you ready to build the skills that will shape tomorrow's world? Our Digi-Tech Building is where ambition meets innovation – a cutting-edge facility designed to prepare you for an exciting career in the digital and engineering industries.

Officially opened in October 2021, the £11.4 million Digi-Tech Building is based at our Ipswich Road campus and is the go-to destination for students passionate about technology, design, and problem-solving. Whether you're interested in coding, games design, digital media, engineering, or electronics, this is where your future begins.

One of the standout features is our impressive wall of programmable logic controller (PLC) stations, each packed with real-world tech designed to give you the skills employers are looking for.

Inside each cabinet, you'll find a Mitsubishi FX5CPU family PLC connected to:

- A custom-built input panel with tactile buttons
- An HMI (Human Machine Interface) screen, just like you'd use in industry
- A breakout connector, so you can hook up external devices like our advanced Mechatronics modules

Each station lets you work with digital and analogue inputs and outputs, and there's a traffic light-style beacon mounted on top of every unit for live visual feedback. You'll programme the PLCs using GX Works3 software, connecting through a local network, just like in real-world automation environments. And before you ever touch a wire, you'll test your code using our Digital Twin simulators, giving you the chance to trial

Key features

Modern classrooms and high-spec labs
60 miles of digital cabling have been installed in the building

Industry-standard equipment and software including:

- 14 Mitsubishi FX5CPU PLC panels
- Touchscreen HMI devices, input buttons, and beacon lights
- Compressed air systems for electro-pneumatic actuators
- Integration with mechatronics kits
- GX Works3 programming systems
- Digital Twin simulators for testing code before going live

your solutions in a virtual space before implementing them on live equipment.

What makes the Digi-Tech Building different is our close connection with industry. Excitingly, seven former City College Norwich students currently employed by R G Carter Ltd worked on the construction of the Digi-Tech Building and four construction students gained a combined 1,184 hours of work experience with R G Carter Ltd on site whilst studying. We've worked with local and national employers to shape the courses and facilities so what you learn matches what businesses are actually looking for.

You'll gain technical know-how, confidence using the latest tools, and experience solving real problems. That's why our students go on to work in fast-growing sectors like cybersecurity, software development, engineering, manufacturing, and more.

The digital sector is one of the fastest-growing and most dynamic industries globally, offering a wealth of career opportunities across a broad range of specialisms. From cyber security to software development the sector plays a vital role in almost every aspect of modern life and business.

You will benefit from access to industry-standard equipment, modern computer labs, and specialist teaching spaces designed to replicate real-world working environments. The digital suites are equipped with the latest software and hardware, providing hands-on experience that reflects current industry practices.

HND Digital Technologies - Cyber Security

5

Level 5

Full Time
2 years

City
College
Norwich

UCAS course
code: D550

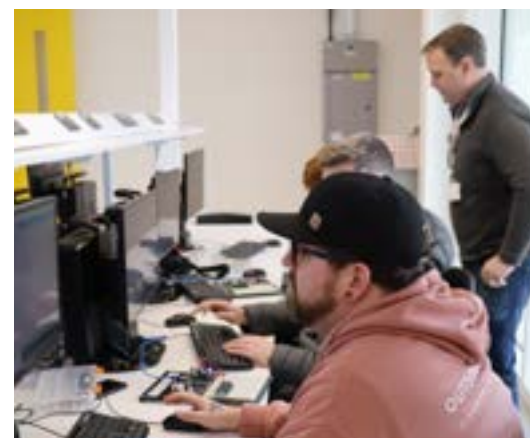

Do you want to understand the nature of cyber crime, and investigate cyber security threats and learn how to mitigate these risks - and progress into an exciting and varied career?

This HND is designed with employer's needs in mind and will help you train or retrain for highly-skilled jobs within key technical sectors. Throughout this course, you will develop and apply your own ideas to your studies, deal with uncertainty and complexity, explore solutions, demonstrate critical evaluation, and use both theory and practice in a wide range of digital technology situations.

Modules include:

- Professional Practice in the Digital Economy
- Innovation and Digital Transformation
- Applied Cryptography in the Cloud
- Work-based Learning in the Digital Economy
- Business Intelligence
- Networking in the Cloud
- Applied Security in the Cloud
- Digital Sustainability
- Big Data and Visualisation

HND Digital Technologies - Software Development and Programming

5

Level 5

Full Time
2 years

City
College
Norwich

UCAS course
code: D500

Are you ready to dive into the world of digital software programming and unleash your creativity in the digital realm?

Whether you're a beginner with no prior programming experience or an experienced coder looking to expand your skill set, our HND Digital Technologies - Software Development and Programming (HTQ) course is designed to accommodate learners of all levels. Our HTQs are designed with the employer's needs in mind and will help learners train or retrain for highly-skilled jobs within key technical sectors.

Modules include:

- Database Design and Development
- Digital Sustainability
- Work-based Learning in the Digital Economy
- Risk Analysis and Systems Testing
- Advanced Programming
- Data Structures and Algorithms
- Emerging Technologies
- Business Intelligence

This rewarding field offers diverse career paths focused on enhancing individual and community wellbeing. Whether your interest lies in public health, healthcare management, mental health, or health promotion, you'll have the chance to make a real difference.

At our Ipswich Road Health Wing, you'll train with industry-standard equipment and cutting-edge technology, including a rare Anatomage 3D anatomy and virtual dissection table. The facility also features hoists, wheelchairs, and other essential tools used in care settings, helping you develop practical skills alongside theoretical knowledge.

UCAS course code: B760

This course is aimed at healthcare assistants and care workers and is designed to offer flexible study around your work commitments.

Created with local employers, including Norfolk and Suffolk NHS Foundation Trust, this accredited course is a strong first step into healthcare, preparing you with the skills, knowledge and behaviours needed for the workplace. As a vocational programme, it combines practical learning with academic reflection. If you're employed, support from your workplace is expected.

You'll complete 460 hours of placement. If you're not in a suitable role, we can help you find one.

Modules include:

- Mental Health and Society
- Cognitive and Biological Systems
- Person Centred Care
- Law, Ethics and Safeguarding
- Practice and Policy in Mental Health Care
- Human Growth and Development
- Intervention and Recovery
- Service Improvement

Higher Apprenticeship - Assistant Practitioner (FdSc Assistant Practitioner Health Studies)

5

Level 5

Full Time
2 yearsNorfolk
House
campusCCN course
code: K0114

The Healthcare Assistant Practitioner apprenticeship at City College Norwich has been developed in collaboration with local NHS Trusts and requires employers to fund and support apprentices for the duration of their programme. This programme aims to provide, supervise and coordinate high-quality, person-centred and compassionate health and social care for a wide range of people.

The role is based across a range of settings and health and care services, such as diagnostics, mental health and learning needs. Healthcare Assistant Practitioners will assist registered professionals in assessing patients and coordinating their care, including referrals to other professionals and undertaking clinical, diagnostic and therapeutic activities. You will learn how to manage your own caseload and how to be accountable for your own actions. Communication is key and you will need to follow strict regulations, legislation and procedures.

You need to have an employer to support your apprenticeship and must be employed in a relevant job role.

Student spotlight

Katie

Studied: Higher Apprenticeship - Assistant Practitioner (FdSc Assistant Practitioner Health Studies)

I studied the Foundation Degree in Health Studies at City College Norwich Higher Education. I was proud to receive the Apprenticeship of the Year award, which was a huge honour after years of dedication working as a healthcare assistant, a role I've been in for over six years.

When I first started at City College Norwich Higher Education, I was incredibly nervous. But once I met my tutors and fellow students, I felt completely supported and actually ended up enjoying it so much that I miss being there now.

A key moment for me was simply walking through the door on that first day, it was such a big step because I struggle with nerves. But from day one, I had the support of a brilliant group of people who helped me through every challenge.

The course trained us to become assistant practitioners and gave us a real insight into various areas of healthcare, both in theory and practice.

In my day-to-day job, I carry out personal care, serve meals, and offer emotional support to patients. But the best part is seeing people recover and go home - that's what makes it all worth it. The staff I work with are incredible too.

Graduating felt a bit nerve-wracking, but mostly I was excited. I wanted my son to see that anything is possible with hard work. I was proud of what I achieved and healthcare had always been my dream. I remembered telling my auntie, who was a nurse, that I wanted to be like her when I was very young.

If I had to pick a favourite moment, it wouldn't be a single event, it would be the whole journey. Just having the courage to do it. I'll remember this experience for the rest of my life.

Do you have a burning desire to bring your creative ideas to life through any of these media?

As a member of the Media Learning Company, you will work collaboratively on a wide range of projects that have been commissioned by external clients. This could include working on documentary films, attention-grabbing promos, awareness-raising campaigns, podcasts, interviews, and more. You will have plenty of opportunity to develop the skills and creative ideas that you are most interested in, within a vibrant and supportive environment. You will be mentored by industry professionals, including Norwich-based Eye Film and past graduates of the Media Learning Company.

The Media Learning Company attracts a diverse range of team members whose different skill sets, creative interests, and life experiences (with a mix those coming to us at 18/19 and older learners) adds to a dynamic learning experience. The ambitious creative projects you will be involved in will see you develop the skills, confidence, and mindset needed for the next steps in your career in media production.

Student spotlight

Jack

Studied: Media Learning Company
Currently: Working for Eye Film as Editor and Videographer

I loved working with real-life clients during my time at the Media Learning Company. When I started the course, I didn't even know how to use a camera - but just six months later, I was nominated for three Royal Television Society awards and won for Best Editing.

I joined the MLC after finishing a Level 3 course, and from day one, I threw myself into every opportunity to film and develop my editing skills. For my final project, I was commissioned to create a documentary

about hip hop for a national dance company. It was an incredible experience – I planned, shot, and edited ambitious content featuring dancers and musicians from both Norwich and London.

That final film opened doors for me straight away. Before I'd even finished the course, I landed a job as a camera operator and editor at Eye Film. The support, experience, and real-world projects at City College Norwich made all the difference.

Alana Taylor
Production Secretary, ITV

"The Media Learning Company helped me so much with my career because it actually gave me a chance to try out all different roles in the media industry and see which one I liked the most."

Matthew Trett
Creative Director, Trett Films

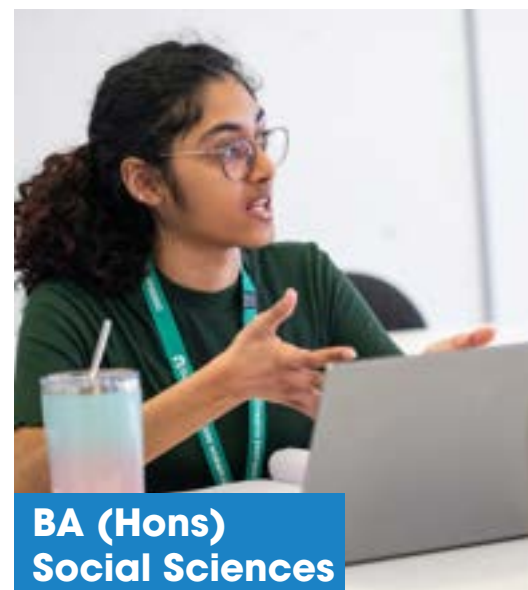

"The course was a great experience to gain lots of knowledge in working for real clients for real projects, which is something I still value today. The course was also a great way of learning what I wanted to do in film and I found my love for cinematography."

Explore the complexities of human behaviour, society, and culture with a Social Sciences course designed to broaden your perspective and develop critical thinking skills.

Gain insights into psychology, sociology, criminology, and politics while learning how to analyse real-world issues and drive positive change. Whether you're interested in shaping social policy, understanding human interactions, or exploring justice systems, this course equips you with the knowledge and skills for a diverse range of careers in research, social work, education, government, and beyond.

Social Sciences

BA (Hons) Social Sciences

6

Level 6

Full Time
3 years

Norfolk
House
campus

UCAS course
code: L000

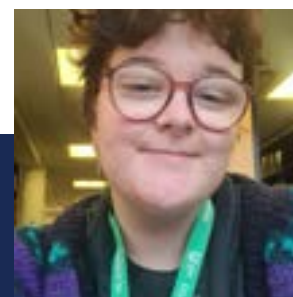

This course is fantastic for those who are interested in current issues and debates in society.

Throughout this course you will cover a diverse range of topics, including the impact of social variables on our lives. The first year of the course explores social science theories and debates. You will also develop academic and professional skills to equip you for higher education study and further vocational destinations. Topics in subsequent years will build upon year one, exploring topics in greater depth or learning new knowledge and skills that align specifically with psychology, sociology and criminology.

Modules include:

- Social Psychology
- Child Development
- Diversity and Professional Standards
- Mental Health and Wellbeing
- Social Divisions and Inequalities
- Media, Crime and Deviance
- Psychology and Crime
- International Development
- Governance, Politics and Social Policy
- Race, Racism and Cultural Identity

Student spotlight

Elicia

Studied: BA (Hons) Psychology with Sociology
Currently: Studying a Master's at University of East Anglia

During my A Levels, I spoke to my teachers and realised that I wanted to continue studying Psychology and Sociology at degree level. After attending a talk about Higher Education at City College Norwich, I knew it was the right fit for me.

The smaller campus without overwhelming lecture halls, the friendly, close-knit class sizes, and the supportive tutors all made it feel like the ideal environment to continue my education.

The content we covered throughout the course was incredibly valuable, not just academically, but also in terms of real-life and work experience.

The knowledge I gained helped me grow both personally and professionally.

As a result of what I learned, I've now secured a full-time role in Youth Work and have been accepted onto the MSc Developmental Science programme at the University of East Anglia. I couldn't have asked for a better foundation.

Do you dream of a career in the field of sports coaching, health, or strength and conditioning?

With strong connections to fitness centres, sports clubs, and governing bodies, this course provides valuable experience, internships, and additional qualifications with the option to specialise in a pathway of your choice in your second year.

BSc (Hons) Sport, Health and Exercise Science

6

Level 6

Full Time
3 years

Easton
College
campus

UCAS course
code: C603

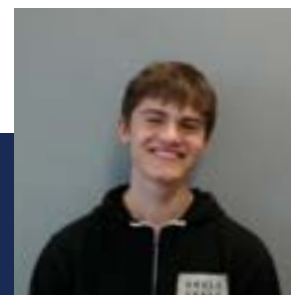

This course is a challenging blend of academic and vocational/professional study that will encourage you to develop and become a reflective lifelong learner by providing a broad, analytical and integrated study of sport, health and exercise sciences. The course aims to support you to enhance your own performance in pursuit of your chosen career through reflection and improvement.

Depending on the pathway taken in the second year of study, you will achieve one of the following awards:

- BSc (Hons) Sport, Health and Exercise Science
- BSc (Hons) Sport, Health and Exercise Science (Health, Fitness, Strength and Conditioning)
- BSc (Hons) Sport, Health and Exercise Science (Coaching and Development)

Modules include:

- Anatomy and Human Movement
- Health and Fitness
- Sports Therapy
- Sport and Exercise Physiology
- Community Coaching and Development
- Coaching and Mentoring
- Health Promotion, Physical Activity and Behaviour Change
- Nutrition for Health, Fitness and Performance
- Sports Events and Entrepreneurship

Student spotlight

Alex

Studied: BSc (Hons) Health, Fitness, Strength and Conditioning

I feel incredibly fortunate to have had the chance to work with both national and international junior athletes during my time on the course. The wide range of modules gave me a well-rounded, holistic view of the coaching industry, which has been instrumental in shaping and advancing my own coaching practice and philosophy.

I owe so much of my success to my lecturers, not just for their brilliant teaching of core theoretical concepts and how to apply them in real-world settings, but also for their constant support and encouragement.

I never imagined myself going to university. I'm the first in my family to do so, and now I'm more motivated than ever to continue my academic journey with a master's degree.

Becoming a teacher is one of the most fulfilling and impactful career choices you can make, offering the chance to inspire and shape the lives of young people every day.

At the Norfolk Teacher Training Centre (NTTC), part of City College Norwich, aspiring educators are supported through a comprehensive, school-based training programme that blends real classroom experience with expert-led professional development.

Education is one of the most exciting, rewarding, and challenging careers you can choose. Norfolk Teacher Training Centre (NTTC) is a leading teacher training provider with an outstanding reputation.

Norfolk Teacher Training Centre, which is part of City College Norwich, is partnered with more than 55 schools in the county, offering postgraduate primary and secondary teacher training over the course of a full academic year. NTTC's school-based courses are ideal for anyone who has a passion for teaching and who wants a substantial element of classroom experience as part of their training.

Trainees and apprentices are based in schools for four days a week and undertake Professional Development sessions with NTTC each Friday. Your school-based experience will be underpinned by a professional development programme through which you will develop the knowledge, skills and understanding needed for the teaching profession, along with the key issues which shape educational provision for young people.

On completion of the course, successful trainees will have QTS enabling them to work as a teacher in maintained or non-maintained schools in England and Wales.

In April 2023 our overall effectiveness was rated as Good by Ofsted:

"The trainees who attend this close-knit ITE provider receive much encouragement. Course leaders foster an environment where individuals build each other up, celebrating successes. It ensures trainees nurture the self-belief needed to face challenges head-on and go on to become capable, committed teachers."

Why train to teach with us?

Everything we do is about training outstanding teachers. We are dedicated to our trainees and their future in this dynamic and rewarding profession. Trainees are at the centre of our teaching programme. We are known for our flexibility and aim to deliver high-quality bespoke programmes leading to outstanding success.

We have strong links with over 55 partner schools, academies and colleges, and we aim to provide high-quality teachers for our Norfolk and Suffolk schools to positively change the lives of their pupils.

Uniquely, we provide the Post Graduate Teacher Apprenticeship (PGTA) route into teaching. This has met the needs of our Primary schools as we have doubled the PGTA numbers in one year.

Supporting you to succeed

We offer our trainees a high level of support for any professional, academic and personal needs. This includes:

- Our pre-induction days across the summer which will prepare you for the start of your training in September
- Experienced NTTC Curriculum Leaders who will ensure you have access to a high-quality curriculum and professional development programme. They will have regular contact with you and will visit you in school each half term
- High-quality mentors at each placement school to support you during your school-based training
- Full access to City College Norwich's learning support services
- Access to the charity 'Education Support Partnership' who offer a specialist team of counsellors and advisers who can support you with personal and professional issues 24/7
- A network of trainees/teachers who can support you during your training year
- 'Go To' specialists and online seminars to support you with your subject knowledge development

your HE journey

How to apply

Applying to study a Higher Education course with us is simple, and we're here to help at every step. Whether you're interested in a Foundation Degree, Honours Degree, or Higher National Certificate or Diploma, here's how to get started:

1

Choose your course

Explore our wide range of Higher Education courses on our website. From healthcare and business to creative arts and engineering, there's something to match your ambitions.

2

Apply

The application process you need to follow depends on the specific university-level course you're applying for. Most of our full-time Higher Education courses are applied for through the UCAS system. For part-time and some specialist courses, you can apply directly through our website. Just find your chosen course and click "Apply now". See the table on the right for a breakdown on application routes including how to find an Apprenticeship.

Course type	Application route
Access to Higher Education	Apply directly at www.he.ccn.ac.uk
Degrees	Apply via UCAS (see UCAS application cycle overleaf)
Foundation Degrees	Apply via UCAS (see UCAS application cycle overleaf)
Higher and Degree Apprenticeships	Visit our website to find out how to apply for an Apprenticeship: www.he.ccn.ac.uk/apprenticeships You can also ask your employer about supporting you to do an Apprenticeship or to apply for an advertised vacancy.
HNCs and HNDs	Apply directly at www.he.ccn.ac.uk
Teacher Training leading to Qualified Teacher Status (QTS)	Visit the Norfolk Teacher Training Centre website for full details on how to apply: www.norfolkttc.org.uk
Other courses	Apply directly at www.he.ccn.ac.uk

3

Attend an interview

Some courses may invite you for an interview, portfolio review or audition. If that's the case, we'll contact you with full details.

4

Receive your offer

If your application is successful, you'll receive either a conditional or unconditional offer. Conditional offers depend on achieving certain grades or qualifications.

5

Accept your offer

Log in to UCAS to accept your offer. If you've applied directly, follow the instructions in your offer email.

6

Apply for student finance

You can apply for tuition fee and maintenance loans through Student Finance England. Visit www.gov.uk/student-finance to apply.

Entry requirements

To be accepted onto one of our courses, you will usually need to be aged 18 or over and have obtained (or be in the process of obtaining) an appropriate qualification and/or sufficient UCAS points.

Our entry requirements are unique for each course, depending on course level and your prior experience.

We have a range of entry requirements and are keen to assess each application individually, recognising that our applicants have a variety of backgrounds and qualifications.

Please refer to the detailed information on each of our course pages on our website for full details of the entry requirements for the course that you are interested in.

Had a break from education?

Don't worry!

Many of our mature students join us after a break from education; some have few, if any, formal qualifications, but this is not necessarily a barrier. In these circumstances, we will make every effort to help you meet these challenges by being flexible and responsive and by providing you with the advice, support and opportunities you need to flourish in Higher Education. We take the time to assess whether you have sufficient relevant experience that we could consider to be equivalent to the qualifications needed.

Recognition of Prior Learning, or Recognition of Prior Experiential Learning (RPL/RPEL)

If you have gained qualifications at an appropriate level that are relevant to the programme, or have relevant experience gained in a work-based or vocational setting, you may be given credit, and possibly exemption, from certain elements of the programme.

Claims for RPL/RPEL must be made and resolved before joining a programme, so be sure to ask at your interview if you think this could apply to you.

I'm almost 60 and I'm going to be starting an MSc. I didn't do my A Levels, or go to university after school and it was something I always wanted to do. It is really important that people are aware that age isn't a barrier to education. I've really valued my experience with CCN HE. We had a real range of ages and we all learnt from each other.

Annie
BSc Wildlife and
Conservation Graduate

UCAS application cycle

Applying to our full-time undergraduate courses is straightforward through the UCAS system (Universities and Colleges Admissions Service). You'll need to submit your application online at www.ucas.com.

We are listed on UCAS as **City College Norwich (Incorporating Easton College)**. Course codes can be found on the individual course sections throughout this prospectus or on the UCAS website.

Applications typically open in September for courses starting the following academic year. The deadline for equal consideration is usually in January, so we recommend submitting your application as early as possible.

When completing your application, you'll need to include:

- Your personal details and education history
- A personal statement outlining your motivations and interests
- A reference from a teacher, tutor, or employer

Once your application is submitted, UCAS will send it to us for consideration. You can track your application status through the UCAS Hub.

If you have any questions about the process, our team is here to help, don't hesitate to get in touch!

- 1. Register on the UCAS website:**
www.ucas.com
- 2. Complete your application:**
Include your personal statement, academic qualifications, and a reference
- 3. Submit your application:**
Our institution is listed as City College Norwich (Incorporating Easton College) and you will find course codes listed in this prospectus
- 4. Track your application:**
Monitor your application status via UCAS Hub

Scan the QR code to visit www.UCAS.com

We are listed on UCAS as **City College Norwich (Incorporating Easton College)**

Contextualised offers

We want to encourage and support students from a diverse range of backgrounds to access Higher Education. We therefore consider a range of circumstances that may have impacted an applicant's prior attainment and offer a reduction in our standard offer for applicants who meet one or more of the following criteria.

Are you eligible?

You live in an area of higher deprivation

- You are a home fee paying student living in England
- At the time of your application, you live in an Index of Multiple Deprivation (IMD) Decile 1–4 postcode

Check your postcode here:

[www.imd-by-postcode.
opendatacommunities.org/imd/2019](http://www.imd-by-postcode.opendatacommunities.org/imd/2019)

You've received free school meals

- You're a home fee paying student living in the UK
- You are currently receiving or have previously received free school meals during secondary school

This information comes from the UCAS application form, which includes questions about whether students are receiving or have received free school meals.

You have experience of care

- Home fee paying students living in the UK, who have experience of care.
- This could include students who have spent time living with foster carers under local authority care, in residential care (e.g. a children's home), looked after at home under a supervision order, or in kinship care with relatives or friends, either officially (e.g. a special guardianship order) or informally without local authority support.

You are estranged from your parents

- You're a home fee paying student living in the UK
- You are studying without the support of a family network

Want help understanding what it all means?

Scan the QR code to check out our easy guide, or head to www.he.ccn.ac.uk/contextualised-offers to learn more.

What next?

If you meet any of these criteria, you may be eligible for a contextualised offer. This can help improve access to higher education and ensure a fairer admissions process.

UCAS applicants who meet one or more of the above eligibility criteria, will receive a contextual offer of up to two grades lower, or an equivalent reduction in tariff, from our published UCAS Entry Tariff for the relevant course.

Please note, we will use the data that you provide on your UCAS application to determine your eligibility and will reflect this in the offer we make to you.

Financial support and bursaries

We believe that financial circumstances should never be a barrier to education. We are committed to supporting our students through a range of financial assistance options, including bursaries and hardship funds. Whether you're just starting your studies or continuing your academic journey, our support services are here to help you manage the cost of university life with confidence.

Explore the options available and discover how we can help you make the most of your time with us without financial worry holding you back.

Course costs

For 2026/27 entry, for home students, the standard cost of our full-time degree courses (including Foundation Degrees) is £9,535 per year. International fees are £15,052 per year.

HNCs and HNDs are charged as follows:

- HNC or HND (per 15 credit unit): £882 or £1,066 for International Students
- HNC or HND "top up" (120 credits): £7,056 or £8,526 for International Students
- Full HND (240 credits): £14,112 or £17,052 for International Students

In addition to the tuition fees above, there are Pearson registration fees which are charged separately. These are not yet set by Pearson, but we expect them to be under £400 in year one, with a further learner registration fee of approximately £30 for each subsequent year of study. You can find full fee information for all our courses – including the fees applicable for international students – contained within the detailed course information listings on our website.

Paying fees yourself

Our college offers an instalment plan to spread the cost of fees. The plan requires you to pay 25% of the fee on enrolment and the balance will be collected by direct debit in equal instalments over the following three months.

Student loans

You may be eligible for a tuition fee loan from Student Finance England to cover your fees. There may also be maintenance loans available depending on your circumstances.

Student loans do not have to be paid back until after you complete your course, and you are earning at least £25k.

If you have dependent children, you may also be eligible for other help such as a Parents Learning Allowance or a Childcare Grant. If you are disabled, you may be eligible for a Disabled Students Allowance.

If your employer is paying your tuition fees

If your employer is paying your fees, they must complete an Employer Authorisation form and sign and stamp it to confirm that they agree to pay your fee.

Contact our Finance Advisers

More advice about Higher Education funding is available from our Finance Advisers on 01603 773322 or by email at financialadvice@ccn.ac.uk

Low-Income Bursary

If your household income is £20,000 or less per year, you'll automatically be eligible for our £500 annual bursary. There's no need to apply - your eligibility will be assessed using information provided by Student Finance England.

This bursary will be paid during each year of undergraduate higher education study at City College Norwich Higher Education, up to a maximum of four years.

Scan the QR code to learn more about our Low-Income Bursary or visit www.he.ccn.ac.uk/financial-support

HE Progression Bursary

If you've recently completed a Level 3 course at City College Norwich, Easton College, or Paston College (within the past two academic years), you may be eligible for our Higher Education Progression Bursary. This bursary is worth up to £1,000 and is payable in your first year of a degree-level course at City College Norwich HE subject to meeting the eligibility requirements.

Scan the QR code to learn more about our HE Progression Bursary or visit www.he.ccn.ac.uk/financial-support

Disabled Students Allowance

If you face extra costs because you have a disability - then you may be able to get help from the Disabled Students' Allowance scheme. Find out more on the government website.

Scan the QR code to find out more or visit www.gov.uk/disabled-students-allowance-dsa

More advice about funding and support at our college is available by contacting our Curriculum Services Team on 01603 773439 or by emailing CSCoordinators@ccn.ac.uk

Council Tax Exemption

If you study full time, we can provide you with a council tax exemption certificate which you can pass to your local authority.

You can request this form via our Higher Education team once you have started your studies. At the start of the academic year, this may take a few weeks to process due to high demand.

Please note: students can only receive one bursary (either the Low-Income or HE Progression) per academic year.

Our campuses

Norfolk House campus

- City centre location: Exchange Street, Norwich, NR2 1DD
- Dedicated space for Degree and Higher Education students only
- Library and IT facilities
- Social spaces and student kitchen area

Located in the heart of Norwich city centre, Norfolk House is used by our Degree and Higher Education students. Most of our classroom and seminar-based teaching and learning takes place here, supported by a dedicated Higher Education library, computing facilities, study areas and social spaces. Located on Exchange Street in Norwich, Norfolk House is easily accessible to all. There are excellent public transport links within a short walking distance and for students who need to drive, there are several public car parks close by.

City College Norwich campus

- Located a short walk from city centre: Ipswich Rd, NR2 2LJ
- Diverse and inclusive mixed campus, shared with further education students and apprentices
- Library and Wellbeing Hub and The Advice Shop
- Dedicated buildings including the Construction Skills Hub and Digi-Tech Building

A short walk from Norwich city centre, City College Norwich is a mixed campus shared with further education students and apprentices. The diverse and inclusive atmosphere makes it a great place to learn, with industry-standard facilities and use of the latest technology in our studios, labs, workshops and health suites. Facilities at our Ipswich Road site also include cafés and restaurants, a theatre, the Advice Shop, our Library and Wellbeing Hub, and an on-site nursery.

Easton College campus

- Bawburgh Rd, Easton, Norwich NR9 5DU
- Operational farm, Equestrian Centre, Animal Management Centre
- On-site student accommodation
- Social spaces, newly refurbished Sports Centre and Tennis Centre

Located just over six miles from Norwich city centre, Easton College is home to our specialist facilities for agriculture and land-based studies, animal studies and sport, including an operational farm, Equestrian Centre, Animal Management Centre, Renewables Hub and Tennis Centre. Set in over 200 hectares of countryside, Easton College is a wonderful place to continue your education and enhance your future prospects. Our student accommodation is also here.

International Aviation Academy Norwich

- Hangar 5, Anson Rd, Norwich NR6 6ED
- Workshops and Boeing 737 aircraft in the specialist Aviation Emulation Zone

The International Aviation Academy Norwich (IAAN Norwich) is a world-class training centre located next to Norwich Airport, training the next generation of aviation professionals. It provides a purpose-built learning environment that allows you to work on a live Boeing 737 aircraft in the specialist Aviation Emulation Zone. Our aviation engineering courses have been developed with employers and provide excellent progression routes to highly skilled and well-paid employment in the aviation sector both nationally and internationally. Courses are delivered in partnership with KLM UK Engineering, who have over 40 years' experience in aircraft technical training and aircraft maintenance and provide direct pathways into aviation engineering and jobs within the industry.

Accommodation

for HE students

We offer accommodation for our Degree and Higher Education students at our Easton College campus to the west of Norwich.

Our accommodation has single study bedrooms. Although meals may be purchased from college catering outlets during term times, rooms are let on a self-catering basis for the academic year (35 weeks).

What's included in the accommodation?

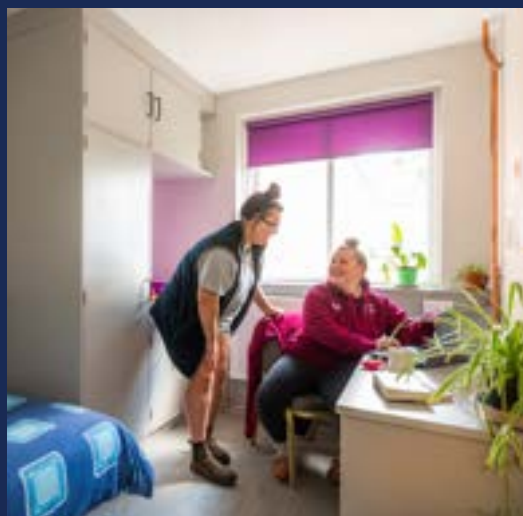

All rooms contain a bed and mattress, a desk, chair, wardrobe, a hot and cold tapped sink, plenty of storage space, a set of curtains, a waste paper basket, a single vanity mirror and light and a good-sized pinboard for organisation. All rooms are centrally heated at no extra cost.

Other facilities and services include:

- Free parking
- A team of Residential Assistants to support your needs
- Clothes washing and drying facilities
- Free Wi-Fi
- Fully fitted kitchens
- Minibus trips and activities throughout the week

Please note, bedding, pillows and towels are not provided.

All our rooms for HE students are en-suite and located in Bradley Hall, where you will also find a large open plan sitting and kitchen area.

Home comforts

We want you to feel at home and relaxed in your own space. You can create your own spaces within your rooms by using posters, photos, books, games consoles and computers. These are all perfect accessories to bring along to help you settle and feel at home.

Please do not bring microwaves, candles, incense sticks or anything flammable. Please refrain from bringing loudspeakers. You are able to bring your own fridges and televisions (a TV licence is required).

Facilities and activities

Easton College boasts some excellent facilities to keep you active and entertained. This includes our Tennis Centre, gym and fitness centre and 3G pitch.

In residence, we offer free daily activities and trips away to fun places. Activities in our calendar include paintballing, go-karting, swimming, football, tennis, basketball, cooking, film nights, city trips and regular trips to the local supermarket.

Accommodation costs and payment plans

HE Accommodation is rented for a set price of £155* per week for the duration of the standard HE academic year. This includes Wi-Fi, electricity, water and all other amenities. *costs are subject to inflationary increase for 2026/27.

Your contract will start in September 2026 and end in June 2027 (subject to course requirements).

Please note the contract relates to academic weeks and your room will need to be emptied during the Christmas period.

Our en-suite rooms are single occupancy study rooms with a bathroom/wet room included. These cost £142.20 per week (inclusive of bills) on a self-catering basis. There is also a refundable £200 damage deposit paid upon application.

We offer two payment options:

Option 1 - Total cost paid at the start of term (September)

Option 2 - Three equal termly instalments coinciding with SLC Maintenance Loan payments

Apply for student accommodation

You can apply for student accommodation by scanning the QR code. A deposit of £200 is required at the time of your application.

Scan the QR code to apply for student accommodation or visit www.he.ccn.ac.uk/accommodation/residential-payments

If you have any questions regarding the application form you can get in touch by calling 01603 731288 or emailing residential@ccn.ac.uk

Norwich: a fine city

We know that where you study can be as big a decision as what subject you choose. Whether you are wondering whether to stay local or to make a move away from home, you'll be looking for a college that offers opportunities for living as well as learning.

When you join our community you become part of the fabric of this welcoming, busy, beautiful and growing city.

Norwich is truly a student city, home to City College Norwich, the University of East Anglia (our partner college) and the Norwich University of the Arts.

Together, these institutions create a large, friendly and active student community, which is reflected in the vibrant atmosphere of the city.

On the map

Norwich is at the centre of a travel network which connects it to all of the towns and villages in the region and onwards to London, the Midlands, the Northern counties and beyond.

London is less than two hours away by a direct train service, which leaves Norwich every thirty minutes. You can also get there by a non-stop coach service, run by National Express from the bus station in the city centre. Heading north, you can be in Leeds in less than three and a half hours by joining the East Coast main line, or Newcastle in under four; less than you might think, which is great for travelling here as well as getting out and about while you study.

Norwich is in the heart of Norfolk, one of the most beautiful counties in the UK.

Living here, you will be close to the Broads, the network of quiet waterways that welcomes sailors, cyclists, paddlers and walkers all year round. Sipping a drink at a riverside pub can be a perfect break from your studies and hiring a boat for a day out with friends is a great

way to celebrate your results in the summer. In Norfolk we have so much coastline we almost take it for granted. The bigger towns attract the tourists in the summer, but there is always space on one of our vast beaches to take a stroll or pitch up for a picnic.

To find out what's going on locally, you can visit one of the following websites:

www.visitnorwich.co.uk
www.visitnorfolk.co.uk
www.nnfestival.org.uk
www.ueaticketbookings.co.uk
www.outlineonline.co.uk

Affordable living

Compared to other UK cities, Norwich presents students with relatively affordable living expenses. From accommodation to dining and entertainment, costs are reasonable, ensuring you can comfortably manage your finances while enjoying university life.

Job opportunities

Norwich boasts a vibrant economy, with particular strengths in sectors such as technology, construction, finance, and healthcare, alongside a thriving creative industry. Major names like Aviva, Norwich Research Park, and Lotus help to create a wealth of employment opportunities, while also offering excellent prospects for networking within your chosen field.

The city was ranked as the highest-performing in the East of England in PwC's 2023 'Good Growth for Cities' Index.

Norwich has also been recognised as one of Britain's top 10 cities to live and work in by The Telegraph (Sept 2024).

Cultural hub

The claim that Norwich has a pub for every day of the year may no longer be true, but you'll still be spoilt for choice. Norwich offers a vibrant nightlife, from theatres and live gigs to cosy pubs and lively bars. Whether you're after a relaxed evening or high-energy entertainment, the city's glowing bars, buzzing venues and packed line-ups have something for everyone.

The city centre features a great mix of independent pubs, clubs, and cocktail bars alongside well-known national favourites. You can try your hand at retro bowling, electro darts, or belt out a few karaoke classics. Film enthusiasts can enjoy live-streamed performances, new releases, and timeless favourites at the much-loved Cinema City.

Music plays a huge role in Norwich's nightlife. From the regular performances by Norwich Philharmonic to major international acts at the Norfolk & Norwich Festival each May, there's always something happening.

The LCR, The Waterfront, and Earlham Park regularly host artists across all genres, while events like Wild Paths and venues like Last Pub Standing showcase brilliant local talent.

Theatre lovers are equally well served, with plays, musicals, comedy, and dance at the Theatre Royal, and intimate performances at Norwich Playhouse - not forgetting its lively bar. For something unique, there's the Norwich Puppet Theatre and the Maddermarket Theatre, home to the community-driven Norwich Players.

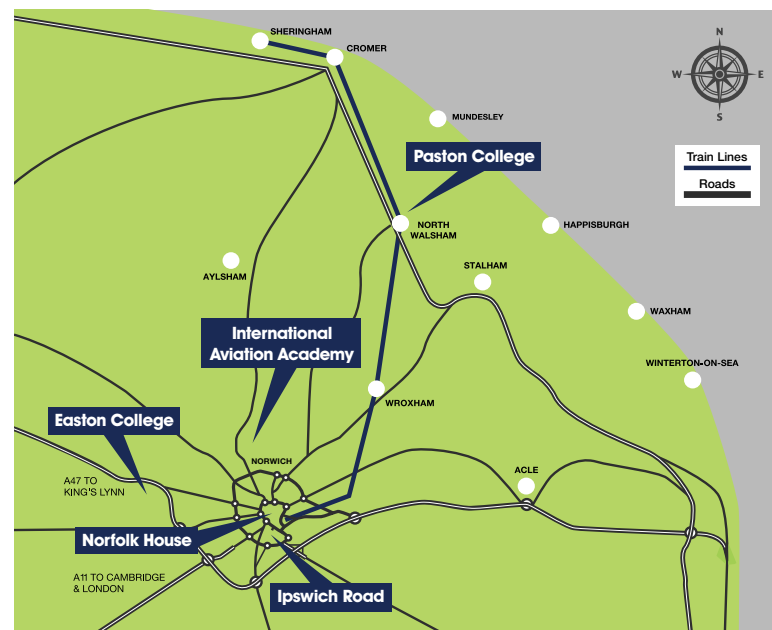

Sport and fitness

You won't have to look far in Norwich to find a proud supporter of Norwich City, our local football team. The stadium at Carrow Road gives a chance to see many of the country's finest teams in action.

If you prefer taking a more active role, the college has great facilities for you to make the most of. As well as our own gym on campus, you can take advantage of the discounted Educational Membership at UEA Sportspark whose facilities include an Olympic size swimming pool, a gym and studios, an outdoor athletics track, outdoor pitches, a climbing wall, squash courts and a gymnastics centre

Norfolk's geography makes it ideal for cycling enthusiasts and 10% of the working population of Norwich often cycle to work. This is well above the national average and something we are encouraging wherever possible, with cycle racks and showers available for use on all of our campuses.

How to find us

Norfolk House

Norfolk House can be found in the heart of the city centre on Exchange Street. There is no car parking available, but lots of car parks are located nearby. The nearest bus stops are on Castle Meadow, Tombland, and Prince of Wales Road.

Easton College

Easton College is located 6.5 miles from Norwich city centre, off the A47. Car parking is available on campus and the nearby village of Easton is well-served by direct bus routes from the city centre.

Ipswich Road

The Ipswich Road campus is located on Ipswich Road, approximately 1/2 mile from the city centre. Car parking is available on campus and bus stops are located outside the college.

International Aviation Academy Norwich

The Academy is located 4 miles outside Norwich, next to Norwich Airport. Car parking is available and the nearest bus stop is 10 minutes walk away.

Travelling by bus

Discounted bus passes are available to all college students. Visit www.ccn.ac.uk/travel to find out more.

Travelling by train

Norwich Train Station is approximately 1.5 miles from our Ipswich Road campus. Bus services operate frequently between the train station and the city centre, which is about an 8-10 minute walk away from St Stephens Street/Red Lion Street.

Got a question about travel?

Higher Education for everyone

Our courses are designed to fit around your life and career aspirations. You can study most courses part-time, meaning you can continue to work alongside your studies and balance other commitments.

At City College Norwich Higher Education, we believe that college is a place where everyone belongs – regardless of background, age, ability, or past experience. Whether you're just finishing school, returning to education after a break, or looking to change direction in life, there's a place for you here.

Education shouldn't be one-size-fits-all. That's why we offer a wide range of courses – from vocational qualifications and apprenticeships to Foundation and Honours Degrees. Whether you're passionate about the arts, care deeply about helping others, or want to train in a skilled trade, there's a pathway that fits your goals and interests.

At City College Norwich Higher Education, we truly believe that college is for everyone – and that includes you. Why not see where it could take you?

School and college leavers

If you've just completed a Level 3 qualification (e.g. A Level or National Diploma), you might be thinking about applying for one of our Honours or Foundation Degrees.

Thanks to strong links with local schools, you could be guaranteed an interview – or even a place. At City College Norwich Higher Education, we're committed to offering opportunities for all, so even if your results aren't what you hoped for, get in touch – we may still be able to help.

Those seeking progression

Our Higher Education programmes have all been designed with progression from our own Level 3 courses in mind.

Our Access to HE courses are specifically designed to provide a route into HE for applicants who aren't coming directly from school and who value the opportunity to reacquire themselves with academic learning.

Mature students

While many students join us from school or college, many have taken a break from studying and are returning to learning. We recognise that the needs of mature students can be different to those of younger students so, at City College Norwich, we will make every effort to help you meet these challenges by being flexible and responsive and by providing you with the advice, support and opportunities you need to flourish in Higher Education.

International students

Norwich is a great place for international students to study and, over the years, we have been proud to welcome many hundreds of students from across the globe. We have specialist advisers in-house ready to offer international students focussed advice about their choice of programme, the programme costs and application procedures. Paperwork and procedures can often be off-putting for international students which is why we always do our very best to give up to date and relevant advice on everything to do with living and studying in the UK through our dedicated International Student Officer.

Information and Advice

The British Council website www.educationuk.org and UKCISA – the UK Council for International Student Affairs ukcisa.org.uk both provide free information and advice about programmes, visas, immigration, finance and fees.

Alternatively, you may contact the International Team on:

From the UK
t: 01603 773 483

From outside the UK

Students' Union

The Students' Union (SU) plays a key role in student life and represents the voice and interests of everyone across campus.

The Students' Union encourages all students to take advantage of the opportunities created, such as events, clubs and societies so you can meet new like-minded people and have an enriching time at college beyond studying.

The Students' Union can also help you access a range of advice and guidance and is always open to suggestions of how we as a college can do better.

As Higher Education students there are ways for you to get involved with the Students' Union alongside the other Executive Officer and student representative positions. There is an opportunity for two Higher Education Officers in the Students' Union, where you can represent your peers and put your ideas for Higher Education forwards.

Become a HE Student Rep

Your voice as a Higher Education student is important to us and there are a number of ways that you can let us know what's working or not working for you as a student.

All of our courses have a student representative for each year. This student represents your views at Course Committees.

Course Committees take place three times a year and are attended by:

- The Head of Higher Education or the Assistant Principal for Higher Education and Adults
- The Higher Education Curriculum Lead for that course
- The course delivery team
- Employers involved in the programme
- UEA representatives

Your experience shapes these meetings, and your course rep will feed this back to the meeting. From this feedback there will be specific actions to improve your experience, which are recorded and tracked through our 'You Said, We Did' action log.

For example, our students requested improved accessibility for one of our buildings, so we introduced a colour-coded system to each floor to make it easier to navigate.

Training for student reps is provided by our Higher Education Leadership team supported by our Students' Union.

What our students say about us

Results from the 2024 National Student Survey (NSS), which is carried out by the Office for Students (OfS), showed high levels of satisfaction among students on our university-level courses.

The NSS asked final year undergraduate students for honest feedback about what it has been like to study on their Higher Education course.

96% of our students said staff were good at explaining things

92% of our students felt free to express their ideas and opinions

94% of our students said staff often made the subject engaging

92% of our students were positive that their course developed their knowledge and skills needed for the future

93% said their course challenged them to achieve their best work

91% said they had received good support from staff

TEF: silver rating for our university-level courses

City College Norwich has been awarded a Silver rating in the Office for Students' Teaching Excellence Framework (TEF), recognising the high quality of its Higher Education teaching, student experience, and outcomes. This marks an improvement from the previous Bronze rating in 2019, making CCN one of just three colleges in the country to move up a level this year.

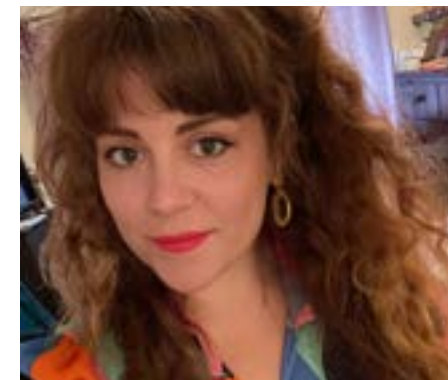

The Silver rating means students can expect very high-quality teaching and support, with some areas considered outstanding.

Awarded by a panel of academic experts and student representatives, TEF ratings help future students make informed choices about where to study.

As a single mum, choosing to go back into studying was a big decision for me and my family. CCN HE offered me the flexibility to pursue my degree while prioritising my role as a dedicated parent. The college has a friendly and supportive atmosphere, along with its openness to innovation, which makes it an ideal place for learning.

Katy-Rae
Studied: BSc (Hons) Sport, Health and Exercise Science (Coaching and Development)

The course has been great for expanding my understanding of the construction industry, beyond my general work required knowledge, which opens up potential future opportunities. The units and teachers are very up to date with construction standards and regulations. The course also covered future building methods, with trips to sites to see examples of them, which is vital for future proofing and reducing carbon to build a better future.

James
Studied: HND Construction Management

I feel like completing the degree showed me that I'm worth something, that I'm good at this and I know my stuff. It allowed me to acknowledge that an environment wasn't right for me and prompted me to look elsewhere. I've had a wiggly career so far, but now I've landed here I know that this is what I was looking for.

Olivia
Studied: BA (Hons) Business Management

Over the past three years I've developed the knowledge, skills, and behaviours which have given me the confidence to lead on new projects applying best practice throughout. The breadth of modules provides an insight into a variety of business functions, meaning you come away with a more rounded view of business.

Ryan
Studied: Chartered Manager Degree Apprenticeship

Supporting your success

When you join our college, you become part of a vibrant and welcoming community. This provides you with the support you need to succeed, but also allows you to make friends and build lasting memories.

We pride ourselves on providing an exceptional level of academic support to our students. Our lecturing staff are accessible, helpful and, above all, committed to ensuring that you have the best possible learning experience. Whether you have been in education recently, or are returning to learning after some time away, you will benefit from an exceptional level of support.

Smaller class sizes

Our smaller class sizes allow our tutors to get to know you properly and to take a real interest in your academic achievements and overall welfare. Our ratio of staff to students is a significant difference to larger universities, making it much easier for you to have access to your lecturers when you need them.

Dedicated tutor support

Our lecturers are accessible, helpful and, above all, committed to ensuring that you have the best possible learning experience. You will have a tutor who will provide you with essential help, support and advice on a wide range of areas, both in and out of college, to help you succeed in your learning. In addition, to your academic tutor you will also have access to our HE student support staff who are on hand to support you to get the most out of your studies and assist in your next steps after your course.

Tracking your success

You and your tutor will be able to stay fully up-to-date with your progress throughout your course with our Achievement Tracking System (ATS). This system allows you to submit assignments online, keep on top of your work with individual assignment schedules, and access your marks, feedback and assessment grades online.

Health and wellbeing

Our Wellbeing Team offers confidential support for any aspect of your health or wellbeing. You can talk to an adviser or make use of the wealth of resources in our Wellbeing Hub. This service is friendly, discreet and non-judgemental and is based in the Library and Wellbeing Hub on our Ipswich Road campus and the Student Centre at Easton College.

Careers advice and guidance

Our Advice Shop offers expert careers advice and guidance to help you decide on your next steps. You can also access specialist support in career development, CV writing, and interview skills. Our friendly and impartial careers advisers are based in the Advice Shop on our Ipswich Road campus and in the Student Centre at Easton College. We also have a dedicated HE Student Support Officer to work with you to develop your employability skills and help to support your career development, based across our sites.

Childcare

For students who are parents or carers to pre-school children we have a Nursery on the Ipswich Road campus. The City College Norwich Nursery is highly-regarded by parents/carers, who include our students, staff, and members of the local community. The Nursery offers care for children ages zero to four, with the option of term-time only or year-round places.

Scan the QR code to find out more about our college nursery.

Student Support Officer

Want to know more?

Visit our website to learn more about the support we offer:
www.he.ccn.ac.uk/student-support

Student Support Officer for Employability and Progression

We provide dedicated support for all Higher Education students through our Student Support Officer, who is available across all our campuses from Monday to Friday.

Hello, my name is Hannah Brown. As the Student Support Officer for Higher Education, I'm here to support you throughout your studies. Whether you need help with college services or just someone to talk to, I'm here to assist you. I can offer support with:

- Accessing college services such as financial advice and wellbeing support
- Understanding procedures for extensions, study breaks, and assessment support
- Developing academic skills and improving personal organisation
- Answering general queries or helping with any concerns

If you are ever struggling at college, have an issue or query that you are unsure how to deal with, or just need a chat, then you can come speak to me.

Additionally, when you join us, you will be invited to take part in our new student survey to help us understand how we can further support you.

“ I know it might sound crazy, but I don't think I could have done it without Hannah's support. With her help, I didn't just pass, I achieved higher levels because of the support I received. She's an absolutely fantastic resource. I've been so impressed with my journey here; it's exceeded my expectations, and Hannah has been one of the main reasons why.

You will also benefit from the support of our dedicated Student Support Officer for Employability and Progression.

Hello, my name is Helen Temple. My role is to support your career development during your studies and guide you towards your next steps after you graduate. I'm available on Tuesdays, Wednesdays, and Thursdays, as well as alternate Mondays and Fridays. I can help you with:

- Careers guidance
- Job searches
- Job applications
- CVs and cover letters
- Interview techniques and practice
- Top-up/Master's searches and applications
- Identifying your transferable and professional skills
- Enhancing your employability
- Finding work experience
- Finding volunteering opportunities

Wellbeing support

At our college you will feel valued for who you are and learn and progress in a secure environment. We understand that transitioning to Higher Education can be a challenge, and we are here to support you along the way.

We want to make sure that you have the appropriate emotional and mental wellbeing support available to you.

Our Wellbeing team are here to help you fulfil your potential and maximise your physical and mental wellbeing with free confidential help and guidance for any concerns that you might have during your time with us. We can advise and signpost you to support available for a range of different concerns from mental health to financial worries.

What we do

We aim to promote positive wellbeing among our students.

There are a variety of ways in which you can access support: from speaking to a member of our Wellbeing Team for one-to-one confidential advice and support, to accessing self-help resources through the intranet, and a referral to our specialist wellbeing services like the mental health adviser and counselling service.

We are here to help you thrive in your academic and personal life while at college.

You can contact us at wellbeing@ccn.ac.uk.

You can visit our drop-in service to talk about anything that is affecting your wellbeing.

This takes place Monday to Friday from 11.30am to 12.30pm in the Wellbeing Hub in the Library at both City College Norwich and Easton College.

If you would prefer a telephone appointment, or an appointment at Norfolk House, that can be arranged by making a self-referral through our intranet page.

The team offers support with any health or wellbeing problem including:

- Housing
- Money matters and debt
- Relationships (personal and family)
- Self-confidence
- Bullying or stalking
- Stress/anxiety/depression
- Bereavement
- Eating disorders or self-harming
- Counselling
- Sexual health (pregnancy and the C-card for free condoms)
- Reducing or stopping smoking, drinking or taking drugs
- If you are a victim of sexual abuse or domestic violence
- Feeling lonely or isolated
- Personal or sexual identity (including LGBTQIA+)
- Being a young carer of a parent or family member

Library services

Our Higher Education library facilities are available across all our campuses, providing access to an array of resources to support your studies.

Browse the shelves

You can borrow any resources by speaking to the library staff at the front desk of each of our campus libraries.

Reservations

You can use the library's reservations service to request items from any college library, to be collected from your chosen library at a time you choose.

eBooks

eBooks are a great alternative to borrowing hard copies from the library or purchasing your own books. They are free to use/download at a library computer, or your own device at home.

Online Journal Databases

You will have access to journal databases, allowing you to search thousands of online journals at the same time. Taylor and Francis, SAGE and ScienceDirect are the largest databases we offer access to.

Referencing

Our library staff are happy to check through your references and in-text citations used in assignments. They are able to check the first three instances of each referencing format, for example books, journal articles and websites, and will leave comments for you to action.

We also offer video guidance on referencing, a referencing checklist and a leaflet with examples of how to format your full references and in-text citations using Harvard referencing.

Proofreading

The library team can proofread up to 500 words of any written assignment. They can check for errors in spelling, grammar, punctuation, in-text citations, and structure.

How to contact the team

For general enquiries, please email libhelp@ccn.ac.uk.

You can also get in touch via phone on 01603 773808.

Both contact methods are manned during library opening hours.

Library opening hours

The library is open during term time from Monday to Friday at the following times:

City College Norwich library

Monday - Thursday: 8am - 6pm
Friday: 8am - 5pm

Norfolk House library

Monday - Thursday: 8am - 6pm
Friday: 8am - 5pm

Easton College library

Monday - Thursday: 8.30am - 5pm
Friday: 8.30am - 4.30pm

Graduation

Completing your university-level course is a significant achievement, and at City College Norwich Higher Education, we believe such a milestone deserves a truly memorable celebration.

Each year, we host our prestigious graduation ceremony at Norwich Cathedral, one of Norfolk's most historic and iconic landmarks.

This special event is the perfect opportunity to mark your hard work, dedication, and success alongside your fellow graduates. Surrounded by family, friends, and tutors who have supported you on your journey, you'll have the chance to reflect on your achievements and look ahead to an exciting future.

Picture yourself in cap and gown, walking through the doors of Norwich Cathedral, ready to celebrate your next big step.

This could be you sooner than you think - start your journey with us today and make it happen!

Short courses and commercial training

If you haven't quite found what you're looking for, why not explore our wide range of part-time, leisure, and professional adult courses?

We offer a variety of courses to support you to upskill in your current industry, retrain to change career direction or learn a new skill or hobby for fun. We also offer employer-led courses for continuous professional development, skills bootcamps and bespoke courses created around the needs of your business. Our courses vary in length and level and take place both in the daytime or as evening session, meaning we have something to suit everyone.

Our offer includes:

Leisure courses

- British Sign Language
- Bushcraft
- Dark Room Photography
- French for Beginners
- Heritage Brick Skills
- Introduction to Criminology
- Lino Printing
- Painting
- Song Writing
- Street Food Cookery
- Willow Basketry

Professional Development

- Beginners Tractor Driving
- Digital and IT Skills
- Dog Grooming
- Floristry
- Forklift Truck Operations
- Gym Instructing
- Tree Survey and Inspection

English for Speakers of Other Languages

If English is not your first language and you would like to improve, our English for Speakers of Other Languages (ESOL) courses are for you. Develop your speaking, listening, reading, writing and grammar skills.

Skills Bootcamps

These free, flexible courses are ideal if you are looking to progress in your current industry, want to change jobs, or if you're self-employed.

Scan the QR code to explore our range of courses or visit our website to learn more
